

## USAGE INSTRUCTIONS

*Thank you for your purchase! Steps for adding and using the Glibatree's, Expressive Characters (Moodboard Pack) as a Moodboard in MIDJOURNEY™ are below. If you have any questions or concerns, please feel free to contact me at [glibatree@gmail.com](mailto:glibatree@gmail.com).*

### TERMS OF USE

By downloading and using this product, you agree to the following terms:

- **No Redistribution or Resale:** You may not distribute, sell, share, or otherwise make these files publicly available to anyone else.
- **Permitted Uses:** You may use these images for training LoRas, teaching Midjourney™ about this style, and for general personal use.
- **No Commercial Claim:** You may not claim these images as your own or incorporate them into works for the purpose of resale.

### DOWNLOAD

When you placed your purchase of the Expressive Animation Collection, you provided an email address. To that email, you will receive a unique download link to your collection. This link does not expire, but please note that it can only be used a limited number of times to prevent unauthorized sharing.

Once you click the link, your ZIP file will begin downloading automatically.

### SETUP

1. **Locate the Downloaded File:** Once the ZIP file has finished downloading, locate it in your device's default download folder or the directory where you chose to save it.
2. **Extracting the ZIP File:**
  - On **Windows:** Right-click on the ZIP file and select "**Extract All...**". Choose a destination folder and click "**Extract**".
  - On **macOS:** Simply double-click the ZIP file. It will automatically create a new folder with the extracted contents.
  - On **Linux:** Use your file manager's built-in extraction tool or enter `unzip filename.zip` in a terminal window.
3. **Folder Structure:**
  - **Multiplied Characters:** This folder contains a selection of character images designed to showcase various poses, expressions, and styles.
  - **Expressive Animation:** Within this folder, you will find another structured collection of images that focus on expressive, animation-inspired artwork.

## HOW TO USE IN MIDJOURNEY™:

### 1. **Sign In to Midjourney**

You will need to be a current Midjourney Subscriber. Log in to your Midjourney account.

<https://docs.midjourney.com/docs/your-midjourney-account>

### 2. **Navigate to the Personalize Tab:**

Once logged in, locate the “Personalize” tab, typically found on the left-hand side of your user interface. Click on it to access moodboard creation and customization options.

### 3. **Create a Moodboard:**

Within the “Personalize” tab, look for the “Create Moodboard” option. Select this to create a new moodboard.

### 4. **Uploading Images:**

After choosing to create a new moodboard, select “Upload Images.”

- Navigate to where you extracted the Glibatree Expressive Animation Collection.
- Choose a specific folder (e.g., “Multiplied Characters” or “Expressive Animation”).
- Select all the images within that folder at once. You can typically do this by holding down Shift (Windows) or Command (macOS) while clicking, or by using your file manager’s select-all feature.
- Click “Open” or “Upload” to import them into Midjourney.

### 5. **Renaming Your Moodboard:**

At the top center above the moodboard name will appear as “Moodboard #X” with a number X, assigned by the system. You may rename it to anything that helps you identify it quickly for future use.

### 6. **Repeat for Both Folders:**

To create moodboards for the two distinct styles (e.g., one for “Multiplied Characters” and another for “Expressive Animation”), simply repeat the process by creating another new moodboard and uploading all the files from the other folder.

### 7. **Using Your Moodboard for Future Generations:**

Once a moodboard is created, you can select it before generating new images to have Midjourney reference that style. In the future, simply choose the relevant moodboard you’ve created to guide Midjourney’s image creation with the Glibatree Expressive Animation Collection’s aesthetic.

## **DISCLAIMER:**

We are not affiliated with Midjourney, and these steps are based on current available features. The process may change over time, and we cannot guarantee that moodboard functionality or these instructions will always remain valid. If you encounter any issues or if the interface changes, please refer to Midjourney’s official documentation or support for the most up-to-date instructions.
